ABOUT BACKSOL

We, at Backsol, a division of Bulwark Systems, functioning since 2002, provide web based solutions to various business firms to generate competitive value. The profile includes Designing of Corporate Identity, brochures, Posters, Website, Portals creation, Web Hosting, Programming and Promotion.

SERVICES WE OFFER

WEB DEVELOPMENT

Backsol's web development services provide you with professional and effective Internet presence at an affordable cost. Depending on your requirement your web site can be a few pages or as big as an ecommerce site complete with a large product database, shopping cart and credit card transaction modules. We offer a turnkey solution starting from conceptualizing your web site through development and hosting of your web site as well as on-going maintenance. We also undertake redesigning of existing web sites. Our web site maintenance package can be utilized to maintain your web sites -services included are search engine optimization and submission, checking all the links in your web site to ensure validity, updating content on your site, maintaining site traffic reports, etc.

GRAPHICS AND MULTIMEDIA DESIGN

Our graphics designers can turn your ideas into visuals in either 2D or 3D. Our services include logo design, brochure design, newsletter design, email letterhead design etc. We also provide high quality computer Based Training modules and multimedia presentations with professional voice overs, jingles and story board conceptualization.

DATABASE MINING AND MANAGEMENT

We can custom design and implement software tools for analytical data management towards research, report generation, cataloging and data mining. We have design capabilities in Oracle, MS SQL Server, PostgresSQL, MySQL and MS Access as backend databases and utilize Visual Basic, Java, ASP, JSP and PHP as front end tools for structuring database domains. We deploy tools such as Macromedia Director, Flash, Fireworks, Dreamweaver, Adobe Photoshop, 3D Effects, Sound Forge etc for highsensory rendering of outputs. In addition we can execute complete RDS - projects from concept visualization to final packaged product for large scale distribution on CD-ROMs (large directories, catalogs etc).

SOFTWARE DEVELOPMENT

Backsol's software development services encompass a variety of platforms and application tools like Unix, Linux, Windows NT, C/C++, Visual Basic, Perl, Shell scripting, Java, SQL, etc. We can offer turnkey solutions for client/server, desktop and peer-to-peer application development.
